

Retina Fellowship

Creteil University Eye Clinic

TESTIMONIALS

My name is Giuseppe Querques. Actually I'm professor in Italy and I work in Milan at the ophthalmologic unit of San Raffaele Hospital. I am still an associate professor at the University of Paris-est Créteil. The link between me and Créteil is still strong.

I started my fellowship in Créteil several years ago.

During my fellowship I perfected my knowledge in the field of medical retina, especially in age-related macular degeneration and I had the opportunity to make research and to collaborate on the publication of numerous international papers.

It was an amazing experience to be taught by world-renowned ophthalmologists.

Overall, I was a very productive experience.

Thank you Professor E. Souied

Retina Fellowship

Creteil University Eye Clinic

TESTIMONIALS

My name is Vittorio Capuano, I'm a 37-year-old Italian Ophthalmologist and I work in Paris in a private practice and as a part time consultant at CHIC.

I came in Creteil 7 years ago and I started my fellowship just after the end of my residency. I've always wanted to attend a retina fellowship.

It was an amazing experience to meet and be taught by world-renowned professors and ophthalmologists like Prof. Souied and Prof. Cohen. The weekly lectures were very informative and provided us with a lot of knowledge, especially when the lecturers share their own experience and stimulate discussion among fellows. During my fellowship I specialize in atrophic macular degeneration and improved my surgical skills in cataract surgery as well.

The opportunity to meet fellow ophthalmologists from all over the world and share our experiences with them was definitely an added bonus.

Overall, I really enjoyed my experience. Thank you Professor E. Souied

Retina Fellowship

Creteil University Eye Clinic

I am Alexandra Miere and I am currently in my 3rd year of Retina Fellowship in Créteil. I began my residency in Ophthalmology in Bucharest, and I came to Créteil 5 years ago as a resident and then stayed on as a Retina fellow.

The fellowship has been an outstanding opportunity to sharpen skills across different areas of ophthalmology and scientific research. I focused my research on OCT-A's applications in various retinal disease. In my clinical practice, age-related macular degeneration, retinal vascular disease and myopic maculopathy played a central part. I attended weekly rounds on retinal disease, which provided systematic reviews on current literature and interesting case discussions.

Overall, this fellowship has been both an exceptional training experience with world-renowned ophthalmologists, as well as a valuable route to career development. It was also a great chance to meet and work with wonderful colleagues and friends from different countries.

Last but not least, I'd like to thank Professor Souied for having given me this amazing opportunity.

Retina Fellowship

Creteil University Eye Clinic

TESTIMONIALS

My name is Francesca Amoroso, 33 y/o from Italy and I am attending the 3rd year of retina fellowship at CHIC.

I heard about Creteil retina international fellowship program during my residency. Throughout my fellowship I have perfected my skills not only in age related macular degeneration, but also in myopia and diabetic retinopathy with a particular attention in laser therapy. I have been having the chance to practice innovative laser therapies using the best and up-to-date laser machines. I specialize in retina photocoagulation as well as in short pulse diode micropulse technique using the NAVILAS. The fellowship is very well structured with weekly ground rounds made by international ophthalmologists. I really enjoyed it. Finally, it was very productive and for that reason I decided to prolong my fellowship.

Thanks to CHIC and Professor E. Souied for making such an educational program.

Retina Fellowship

Creteil University Eye Clinic

TESTIMONIALS

I am Sergio Piscitello a 32 years old European ophthalmologist from Sicily. I came to know about the international retina fellowship via internet during the last semester of my residency. Attending to such retina fellowship was always one of my targets.

Actually, I am learning a lot, as the medical team of Creteil is learned and they provide me with the latest updated knowledge in medical retina. The professors are always prone to sharing their knowledge with residents and fellows. Moreover, knowing ophthalmologists from other countries is a great opportunity. Finally, I got the honour to work in one the most prestigious retina service in Europe, the CHIC. The organization of the fellowship is perfect with workshops, ground rounds, clinical and surgical training. It is a great opportunity to improve my skills and to know some of the best experts in ophthalmology of the world. Moreover, I am getting to know new people and wonderful colleagues from every part of world. Because ophthalmology is not only medicine but also friendship and collaboration.

Last but not least, I would like to thank Professor E. Souied, my master, for giving me this chance.
